
GARY HILL

Title:Mesh

Date:1976

Media:Video (color, sound); 1:40 min.

Video Link :<https://vimeo.com/111258462>

Description:

A fixed color camera is slightly defocused on the wire mesh of a window screen. Outside the window the leaves of trees are moving with the wind. The images, about one-half second each, are edited directly to the master tape at intervals based on the set-up time of each edit. The sound is of the room itself, which is, for the most part, the editing button being pushed down for each edit. With each edit the wire mesh and background colors shift slightly. The work is about 'meshing' time and view.
